

The above map is only a partial showing of what we did as I failed to change the batteries in my GPS!

Started in Moab. Toured Gemini Bridges from the top and then from the bottom. Great views. Started on Gold Rim trail until we got to the drop into the wash. We didn't want to come back up it so we turned around and exited.

Across 163 we picked up a loop trail which dead ended (?) at a hiking access point to Arches. We turned around and kept right which put us on the Copper Ridge / Sovereign Trail. Just before Willow Flats Rd is a pretty steep drop (N bound). We took the other Sovereign Trail (not the one from yesterday, today on the W branch) which picked up the Copper Ridge Rd.

Klondike Bluffs trail to the old cabin and down into Salt Valley, into Arches (we had our receipts), back to Sand Rd south of Tower Arch, Sand Rd to Willow Flats, into the park, main road out as sun was lowering behind clouds in the west. Return to Moab.
